Summary

Sean Kuan-Hsuan Liao

Taiwanese citizen
Amsterdam, NL

I'm just looking for something interesting to do, anything between software engineering and devops would get my attention. Helping people out and solving their problems is something I actually generally enjoy doing. Tech wise, my current primary area of focus is with observability: instrumenting and displaying everything in a coherent way.

Experience

De Bijenkorf / Site Reliability Engineer

2020 - 2021 Amsterdam, Netherlands

Platform: GCP/GKE/Kubernetes, Cloudflare, Terraform, (security) policy enforcement
Observability: Prometheus/Grafana, Elastic/Fluentd/Kibana, OpenTelemetry/Jaeger
CI/CD: Jenkins/Ansible -> Github Actions/ArgoCD/Helm

Education

University of Amsterdam / MSc Security & Network Engineering

2019 - 2020 Amsterdam, Netherlands

L1-L4 networking, infosec

National Taiwan University / BBA Information Management

2014 - 2018 Taipei, Taiwan

Data science/AI/ML, system design, business management

Other

Most of my projects can be found on Github @seankhiao or archived @erred.

seankhiao.com

My site/blog where I keep track of various things I tried and had trouble with.

Go (Programming Language)

I'm currently an active member @golang with a primary focus on the issue triage

Spoken Languages

English, Chinese (Mandarin, Traditional)
